DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26 and 35-40, drawn to a method, a device, and an article for obtaining a cyclic redundancy code for a message, classified in class 714, subclass 781.
 - II. Claims 27-34, 41-45, drawn to a method, a device, and an article for incrementally updating a cyclic redundancy code, classified in class 714, subclass 788.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case as follows:
 - a. Invention I has separate utility such as obtaining a cyclic redundancy code for a message by separating the message into a plurality of segments; multiplying a remainder for each segment by a segment-constant based on a generator polynomial to obtain a plurality of segment-remainders; accumulating the segment-remainders to obtain an accumulated-remainder; and moduloing the accumulated-remainder by the generator polynomial to obtain the cyclic

redundancy code for the message. These are patentably distinct features not found in invention II.

b. Invention II has separate utility such as incrementally updating a cyclic redundancy code by subtracting a prior message from an updated message to obtain a difference; moduloing the difference by a generator polynomial to obtain a remainder; and adding the remainder to a cyclic redundancy code for the prior message to obtain an updated cyclic redundancy code for the updated message.

These are patentably distinct features not found in invention I.

See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. In order to expedite the prosecution for the subject application, the non-elected claims should be canceled in response to this office action.
